

The image features a dark background with a central black band. Above and below this band are decorative horizontal strips with a light gray background. These strips contain a complex pattern of black lines resembling circuit traces, with several solid black circles acting as nodes or solder points.

Working Remotely

Western Greece Software Development Meetup, July 2017

Marios Karagiannopoulos

Agenda

- \$ whoami
- Working from home
- My remote story
- Prerequisites
- Pros/Cons
- Tools
- Best Practices

\$ whoami

- Lead software engineer
- 17+ yrs professional experience (Greece, USA, Sweden)
- Worked in both big companies and startups
- ~10 yrs part time remote
- ~6 months full time remote

Working from home

What my friends think I do.

What my mom thinks I do.

What my neighbors think I do

What my boss thinks I do.

What I think I do.

What I actually do.

My remote story

- Setup a 3-mon trial period on site
- Established plan to make frequent visits back for face-2-face time (once a month)
- Made sure I had the necessary tools to get my work done
- Proved that I could be trusted to work remotely
- In a very short period of time I took part in major discussions/decisions of the product roadmap
- Interviewed and hired my first on-site engineer and started building a new team

Prerequisites

- Not ideal for juniors to mid-level engineers
- You need to be self-managed and self-motivated
- Dedicated space – big enough for you to work (windows are a plus)
- Reliable high speed internet connection
- Hardware equipment (UPS, backup plan, headphones, web cam, microphone)
- Secure communications (wifi, VPN, firewalls, antivirus)
- Your office door should have a very good lock ;-)

Advantages

- More productive / Less distractions
- Focus on the real work
- Flexibility (better work/life balance)
- No commute (saving money and time)
- The more remote CV experience the better, in order to chase other opportunities
- Lower stress

Disadvantages

- Feeling disconnected from team / Loneliness
- Boundaries between work and home get blurred
- Need strong dedication and discipline

Tools

- Skype for the daily chats/groups/etc
- Slack for dedicated channels
- Zoom/Hangout for screen sharing or presentations
- Confluence for meetings notes and/or documentation
- JIRA for tasks sharing or bugs
- Git for Version Control

BEST PRACTICES

Daily Routine

- Set and enforce boundaries/rules
- Wake/start work as consistent time
- GET DRESSED!!!
- Communicate with boss/client on regular basis
- Daily 'scrum' works great
- Take regular breaks
- Learn how to 'turn off' work

Maintain Communication

- Make sure you communicate effectively and consistently
- If there is an issue/emergency, let your boss/client know as soon as possible
- Notify boss/client when you will be away from your desk
- Regular face to face time
- Even if over video chat

Avoid Bad Habits

- Don't deviate from routine unless absolutely necessary
- Inconsistent start/end times
- Too much 'away from keys' time
- Long lunches
- Working in PJs
- Go outside!!!

Be Responsible

- Meet deadlines & complete tasks
- Manage expectations as work progresses
- Be on time for meetings
- And be dressed if video meeting
- Answer phone/IM/Email in timely fashion
- Be proactive
- Maintain clean work area
